City of San Bruno Districting 2021

Total Population by Population Unit

Population for each population unit area is shown on map. The population of each of the districts should be about 10,977 persons, with no more than a 97 population difference between largest and smallest districts. Use colored markers or highlighters to mark district boundaries.

Submit your completed map to districting@sanbruno.ca.gov
 Mail your map to City Clerk's office, Attn: Districting,
 17 El Camino Real, San Bruno, CA 94066.

Your Name:

Maria

Home and/or Email:

An online version of this map that allows you to zoom in and out for more detail is available at districtingsanbruno.org

1-10-22

- I just received an email today re the districting issue.
- I was not able to map it out online so I am sending this written form.

* { Include all areas East of El Camino for District One.

However that population = 12,364

You could logically eliminate POP block 2486 which would leave District One with less than 10,977 pop. at 9,878.

Subject: San Bruno Districting - New submission from Communities of Interest Worksheet

Name

Charles Meyer

Email

[REDACTED]

Are you a resident of the City of San Bruno?

Yes

What is the nature of the common social or economic interest of your community?

My nature of interest lies with San Bruno as a whole, specifically functional/infrastructural issues which affect different areas of our city to different degrees. My goal is for San Bruno to upgrade/renew infrastructure were needed the most. ie: Flooding on the low lying areas to the east of El Camino Real, making sure our sanitary and storm sewerage systems are of such condition of repair, age, and capacity to meet current needs including an eye toward future needs, as budgets allow.

I also believe San Bruno has a unique opportunity to move the communication ability within our community to a new, future looking level, by installing fiber optic cable to each household, and business. This will allow information to flow around our fine city with the speed, capacity, and resilience needed for our future.

Where is your community located?

My community is the Crestmoor neighborhood, and we are in pretty good shape. I would like to see the more physically needy areas of my city improved first.

What are the geographic definers/boundaries of your neighborhood?

We are pretty much Sneath Lane, Hwy 280 (or El Camino Real), Skyline Blvd, and Crystal Springs Road.

What is the rationale for your community of interest to be used in the district formation process?

My rationale for my map submission is that our city is represented according to geographical lines. I believe this is easier for people to understand, minimizes special interest "Gerry Manders", and levels the playing field for our elected representatives. We don't want our districting to pit one demographic against another. Where a geographical area has more, or more concentrated population, then that area will need a larger share of city resources. This is especially true where items like parking, traffic, infrastructure, and policing are concerned.

My Community of Interest is SAN BRUNO, and how we conduct ourselves to set a positive example for similar communities.

I wasn't able to figure out the software. I wanted to propose a community based on the transit corridor. Someone just suggested to me that I send you a screenshot. Here it is - I hope it isn't too late. I didn't have time to go back and figure out the population numbers again, but when I tried before it came out ok.
